

Figures to assist with abstract for Casper and Naylor.

Figure 1. Conceptualised drawing of accretion and erosion cycles of Silverdale Marsh compared with the saltmarshes of the entire Morecombe Bay area (sources of data: Gray, 1972; Pringle, 1995; Adam, 2000).

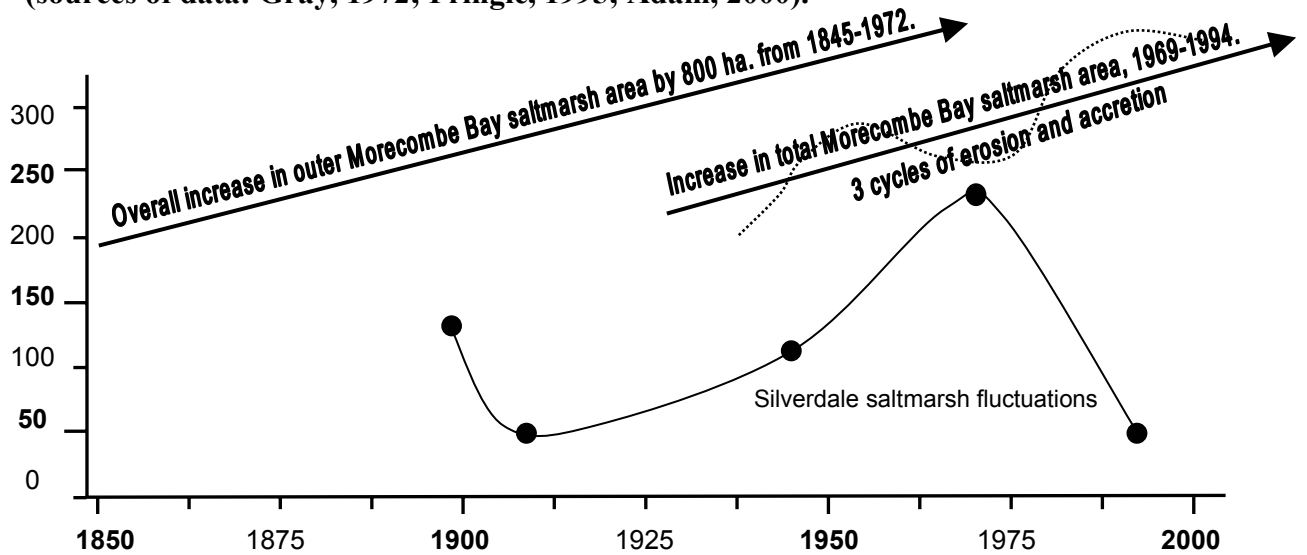

Figure 2. Conceptual drawing illustrating effects of some human activities (in addition to/other than land reclamation) on different saltmarshes. Slope of the arrow is indicative of the rate of accretion and/or erosion. Red arrows indicate erosion, green indicate accretion.
