

Dear Colleagues,

The Organizing Committee is pleased to invite you and to draw your attention to the inaugural conference of the Interreg project **USAR: Using Sediment As a Resource**, on **June 15, 2016 in Lille, France**.

**Key outputs for USAR project include:**

- Inventory catalogue of possible uses of sediment as a resource and conditions, potential, limitations for use;
- Recycling strategies for partner territories based on local potential for uses of sediment;
- Pilot tests to validate new uses of sediment on different sites;
- Operational Sediment Management System: ICT-tool for water managers to make business cases and management decisions for recycling of sediment.

This conference will be held in the **AQUACITY** Exhibition: the activities and technologies around water and sediments.

**USAR** conference **information:** For more information about **USAR** and **AQUACITY** events, please find below your local contact:
