

SEDNET CONFERENCE

25th September 2015

Eng. Ngoufo GANGNIMAZE

Ecole Centrale de Lille, FRANCE

*Faculty of Geology, Geophysics and
Environmental Protection, AGH University
of Science and Technology, Krakow, Poland*

MANAGEMENT DECISION PROCESS OF BENEFICIAL REUSE OF MARINE SEDIMENTS IN CIVIL ENGINEERING APPLICATIONS

SUMMARY

- CEAMaS PRESENTATION
- LEGISLATIVE ISSUES
- TECHNICAL ISSUES
- APPLICATIONS

CEAMAS PRESENTATION

INTERREG IV B PROJECT (2013-2015)

PARTNERS

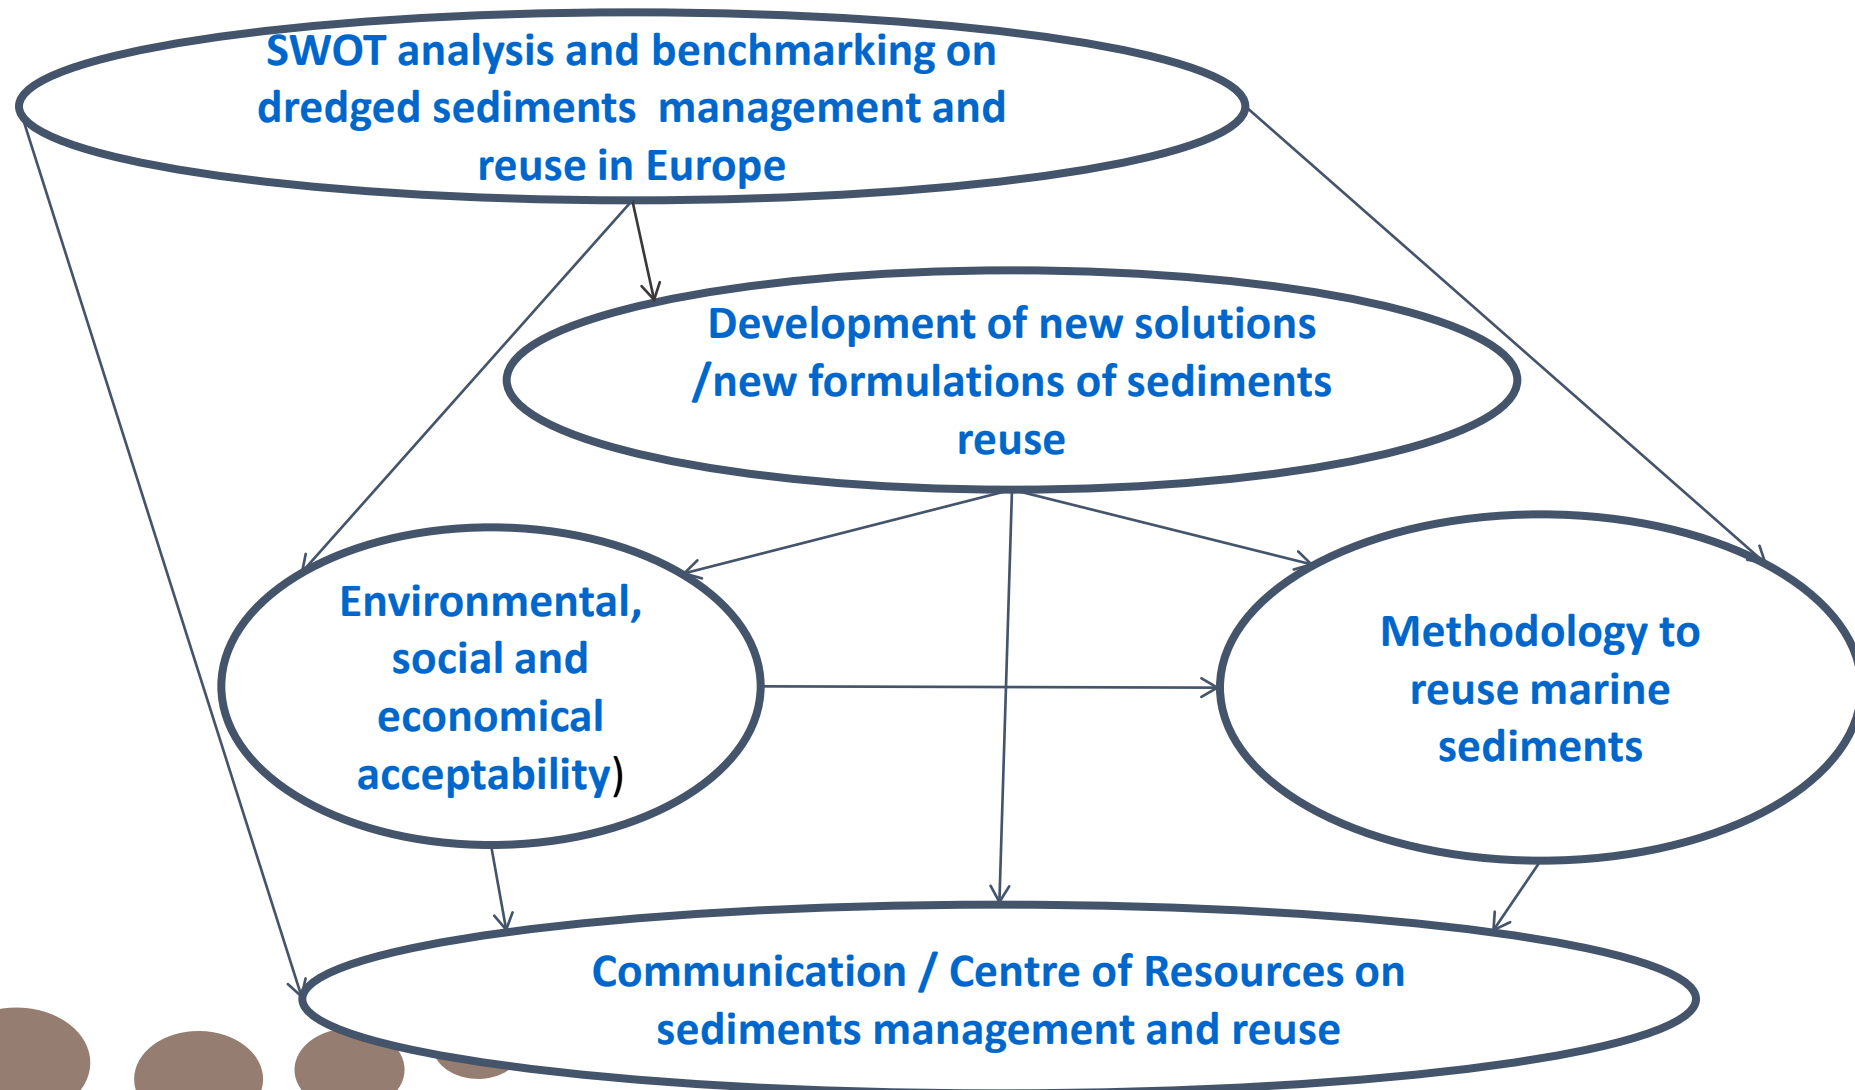

- France :
 - Cd2e
 - BRGM
 - Ecole Centrale de Lille
 - Université de Lille 1
- Ireland:
 - University College of Cork
 - Cork Institute of Technology
- Belgium
 - BBRI
- Netherlands
 - TUDelft / Deltares

CEAMAS PRESENTATION

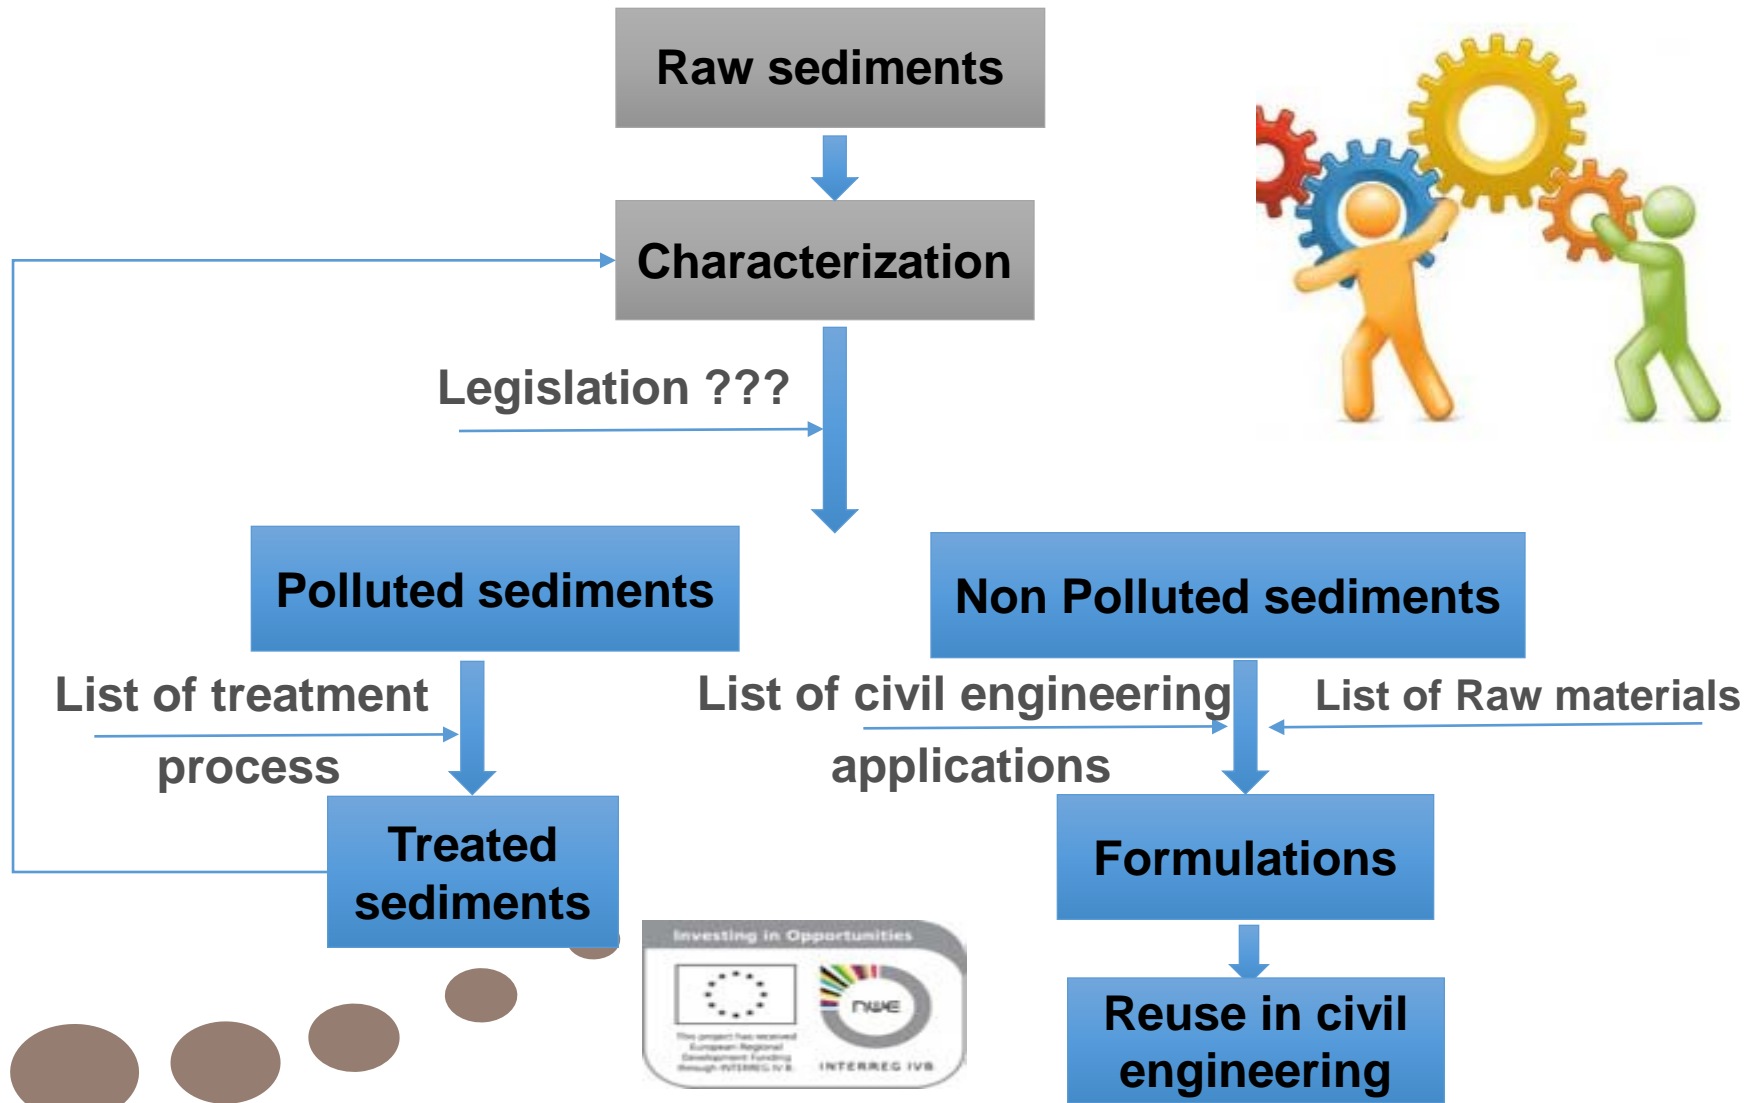

5 LINKED WORKPACKAGES

CEAMaS PRESENTATION

WP2 VISION

LEGISLATIVE ISSUES FOR REUSE

MAJOR CONVENTIONS RELATED TO SEDIMENTS

- OSPAR CONVENTION
- LONDON CONVENTION
- BARCELONA CONVENTION
- HELSINKI CONVENTION

LEGISLATIVE ISSUES FOR REUSE

LEACHING TOOL ACCORDING TO NEN 7373 (2004)

TECHNICAL ISSUES FOR REUSE

ACTIONS IN WP2

WP2 - Development of new solutions /new formulations of sediments reuse

TECHNICAL ISSUES FOR REUSE

SEDIMENT CHARACTERISATION TECHNIQS FOR REUSE

METHODOLOGY

A6 - PHYSICAL, GEOTECHNICAL, AND CHEMICAL CHARACTERIZATION TECHNIQUES OF SEDIMENTS

Netherlands

France

Ireland

Site Description and sampling Methods

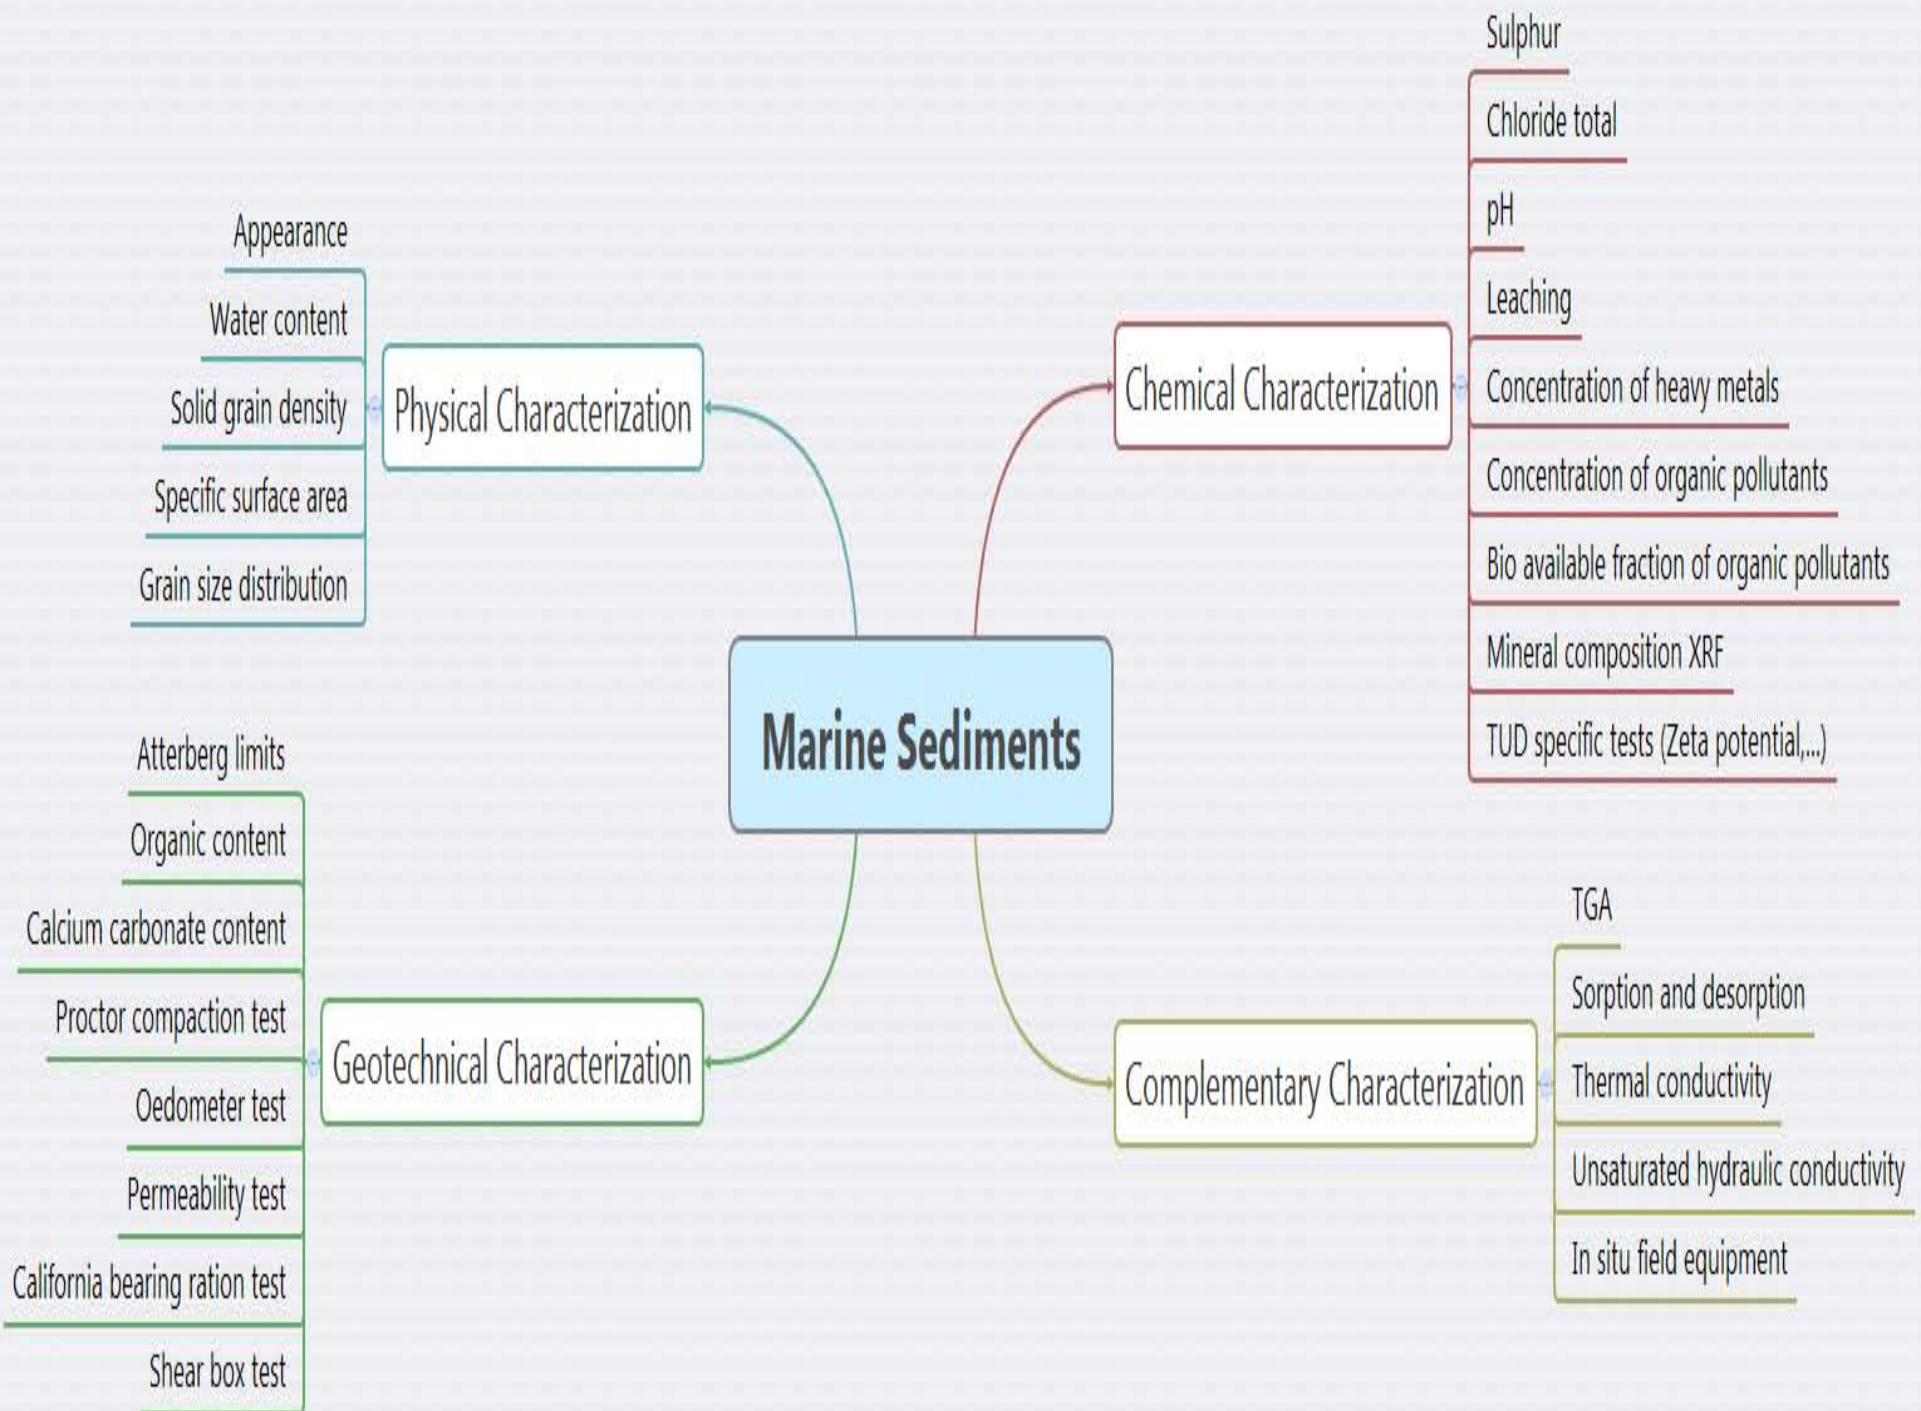

A7- CHARACTERIZATION OF SEDIMENTS

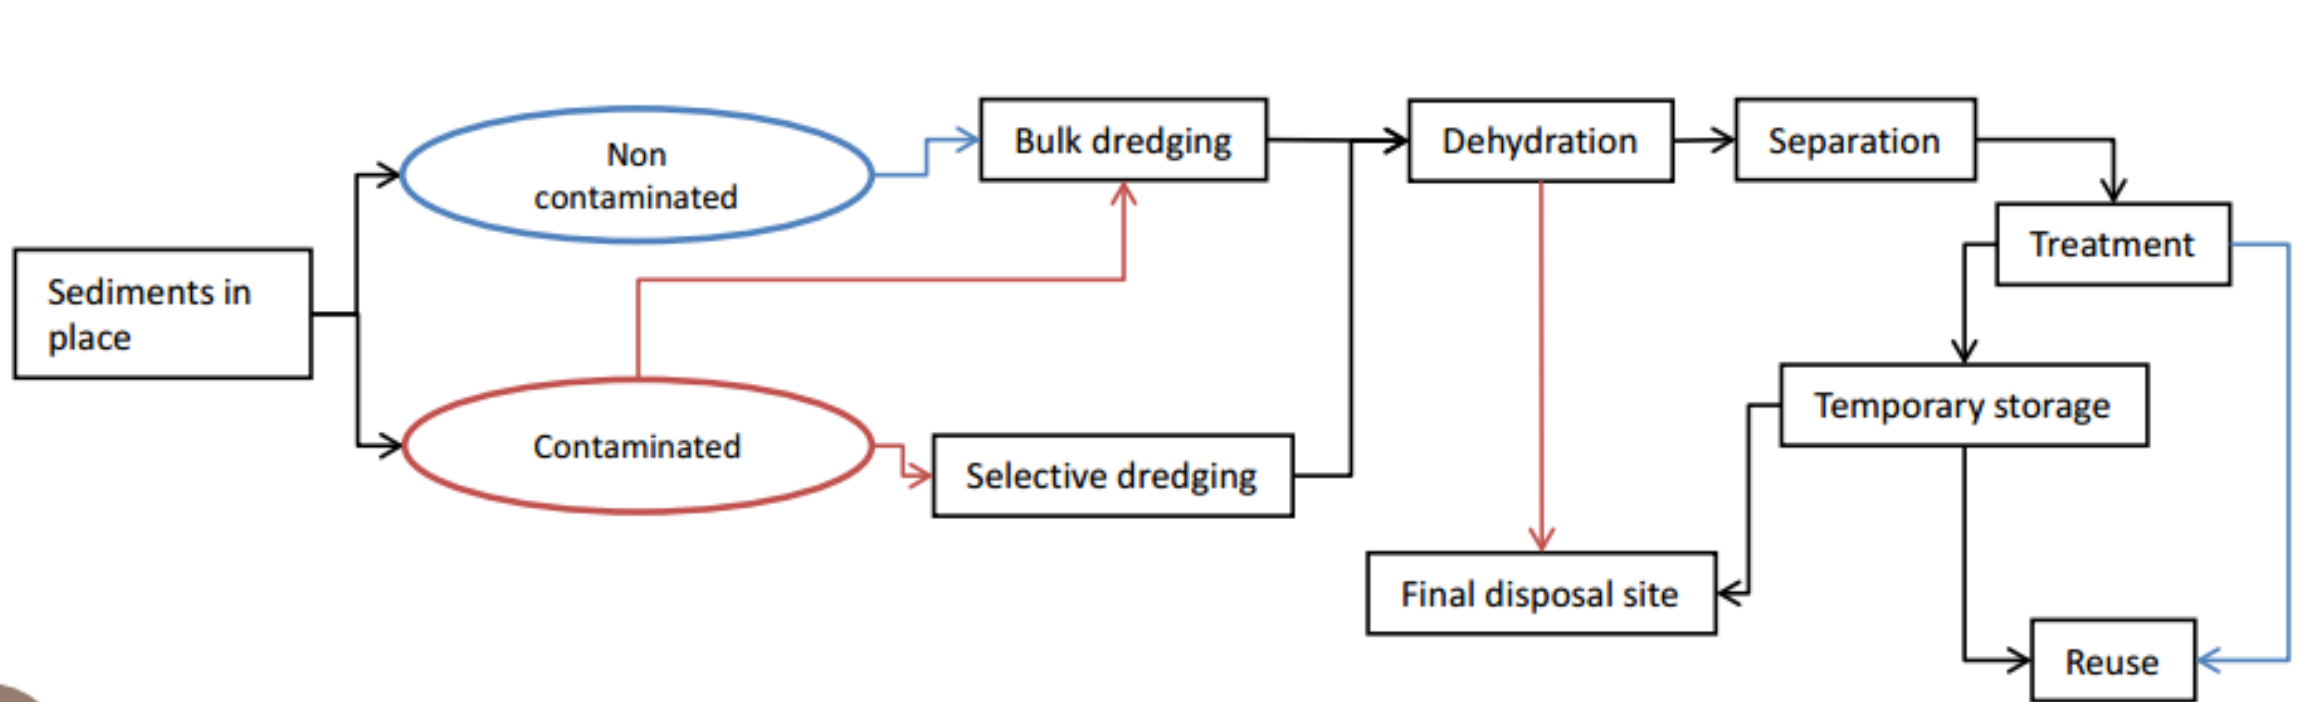

Synoptic file for each studied sediment + Classification

A8- Requirements for sediment-based civil engineering formulations

TECHNICAL ISSUES FOR REUSE

TECHNICAL ISSUES FOR REUSE

EC LILLE

Physical, Geotechnical and Complementary characterization

Density
Water content
Grain Size Distribution
Atterberg limits
Methylene blue adsorption
Specific surface area
Calcium carbonate content

Organic content
Proctor Compaction test
Consolidation test
Permeability
TGA
Sorption & Desorption
Thermal Conductivity

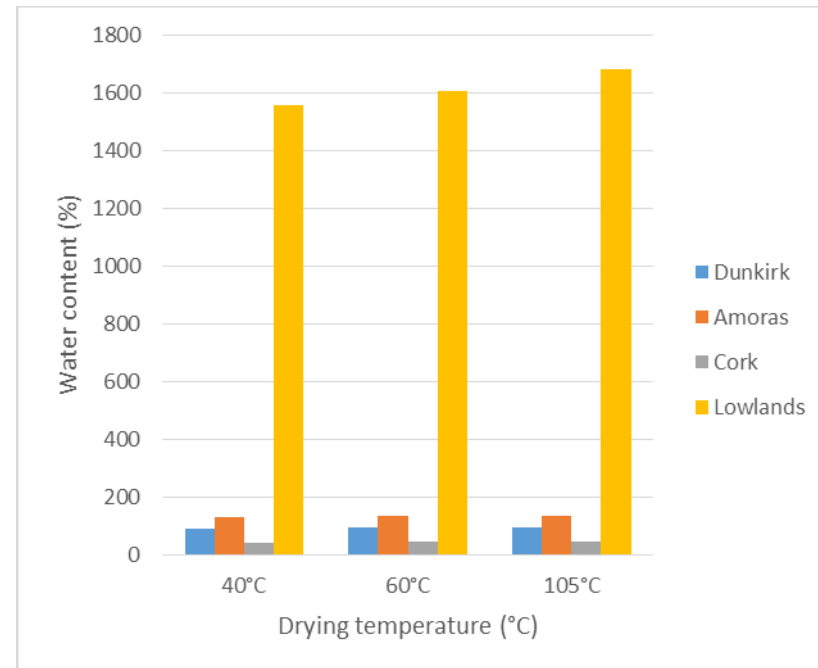

TECHNICAL ISSUES FOR REUSE

EC LILLE

PHYSICAL TESTS RESULTS

Water content in the raw sediments (NF P94-050)

	40°C	60°C	105°C
Dunkirk	92,58	93,78	95,5
Amoras	132,84	134,54	136,5
Cork	44,15	44,5	45,05
Lowlands	1555,4	1606,86	1683,35

EC LILLE

PHYSICAL TESTS RESULTS

Particle size distribution (by laser granulometry: Malvern Mastersizer 2000)

Granular fractions (NF EN ISO 14688-1)	Clay ($< 2 \mu\text{m}$)	Silt (between $2 \mu\text{m}$ and $63 \mu\text{m}$)	Sand (between $63 \mu\text{m}$ and $2000 \mu\text{m}$)
Dunkirk	6,03	65,53	28,43
Amoras	5,48	67,41	27,11
Cork	1,89	36,33	61,79
Lowlands	0,85	13,29	85,86

TECHNICAL ISSUES FOR REUSE

EC LILLE

GEOTECHNICAL TESTS RESULTS

Atterberg Limits (NF P94-051)

	Liquid limit (LL)	Plastic limit (PL)	Plasticity index (PI)
Dunkirk	65,15	33,27	31,88
Amoras	85,97	32,25	53,72
Cork	-	-	-
Lowlands	530,1	232,89	297,21

TECHNICAL ISSUES FOR REUSE

SEDIMENT CHARACTERISATION TECHNIQS FOR REUSE

WP2-Development of new solutions of sediments reuse

WP2 – Development of new solutions of sediments reuse

A6 - Definition of common characterization methods **A7 - Characterization of different sludge types and compositions**

Properties

Physical Chemical and mineralogical Geotechnical Others

Properties Water Content **Standards / Methods** NF P 94-050

Methods **Results**

APPLICATIONS

Road construction				
Road embankment, fines	Road embankment, sand	Road embankment, self clear	Road sub base	Parking lot road surface
Soils				
Soil elevation (meadow depo)	Lift up of Lowlands	Wet storage (deposit)	Filter cake press	
Soils				
Nature development, on land	Nature development, wetland	Sand separation	Hydrocyclone for sand separation	Natural Ripening
Soils				
Enhanced ripening with geotextiles	Landfarming	Energy crops	Sound walls	Capping of deposits

APPLICATIONS

Dikes and safety against flooding				
Trench shoring 	River Embankment 	Dike, river site scouring protection 	Dike, land site terrace 	Lake, erosion protection
Dikes and safety against flooding				
Shallow lakes, ecological enhancement 	Reallocation at sea 	Sediment store (baggerbuffer) 	Sediment settler (trapping) 	Terp (local ground elevation)
Building industry				
Brick production 	Artificial gravel production 	Artificial basalt 	Concrete for roads/coastal defence 	Cement mortar production
Building industry				
Cement granulate production 	Stabilisation/Solidification 			

Thank you!

www.ceamas.eu

A WHAT-IF TOOL

- A « what-if » decision support environment :
 - to simulate the various consequences of available management options
 - to take into account possible options in Belgium, France, Ireland and the Netherlands
 - Indirect benefits for options that would not be retained in a local tendering process (widened system boundaries)
- => Exchange and sharing for return on experience between each country

TARGET AUDIENCE

- Goals of the CEAMaS decision tool:
 - to allow various users to explore sediment management options in a port situation, and discuss them within the same framework
 - to act as a hub for the other more detailed tools or studies of the CEAMaS project, and beyond them, in the European Centre for Resources
- Targeted users:
 - students and communities, not necessarily with a high technical background
 - port decision makers and territorial authorities
- The tool includes specific points of view for civil engineering companies that can reuse sediment.

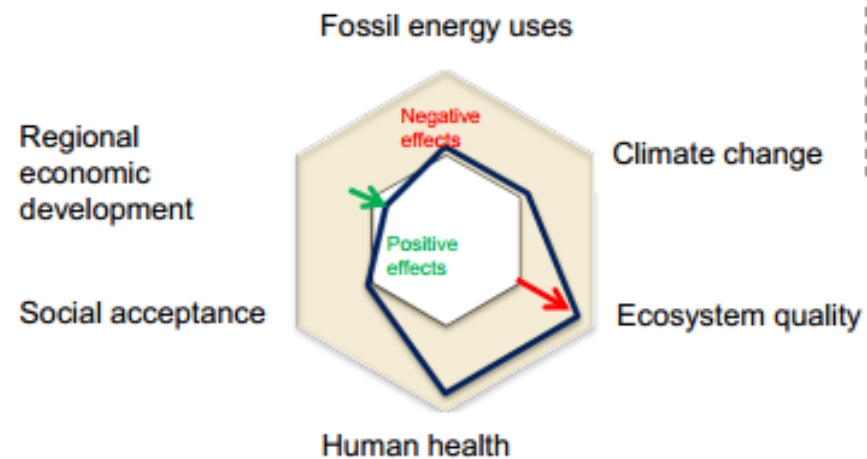

100% reference scale = « worst » scenario

Decision risk
level
note

Cost assessment
k€

Improvement
due to sediment
management

Damage due to
sediment
management

Compared to the « nothing done » option

	Convention OSPAR	Convention de Londres	Convention de Barcelone	Convention de Helsinki
Date d'application	1992	1972 - 1996	1978 - 1995	2000
Echelle géographique	Atlantique nord-est	Pays contractants	Mer Méditerranée	Mer Baltique
Objectifs	Protection du milieu marin	Protection du milieu marin	Protection du milieu marin	Protection de l'environnement marin
Gestion des sédiments	Possibilité d'immerger les sédiments de dragage.			
	Caractérisation du sédiment en vue de l'immersion.			
	Pas de solution lorsque les sédiments ne peuvent pas être immergés.			
Guides et ouvrages de référence	- Guide pour la caractérisation des sédiments de dragage.	- Instructions pour l'évaluation des sédiments de dragage - Guide pour la mise en place de seuils pour les sédiments de dragage.	- Protocole « immersions »	-
