

Session Sediment Quality...

1. **On the move** through 10 talks from Chemistry to Ecotoxicology and Ecology, from cellular to community level... Somewhere between “SQC” and “Policy for sediment management” sessions
2. High diversity of relevant (classical and new) tools existing
3. Move toward a better assessment -> elaboration of adapted smart integrated approaches in function of the objectives of the evaluation = current and future challenge
4. Discussion mainly on the “sampling” issue -> suggestion of a special session in the next SedNet conference
