USAR-project

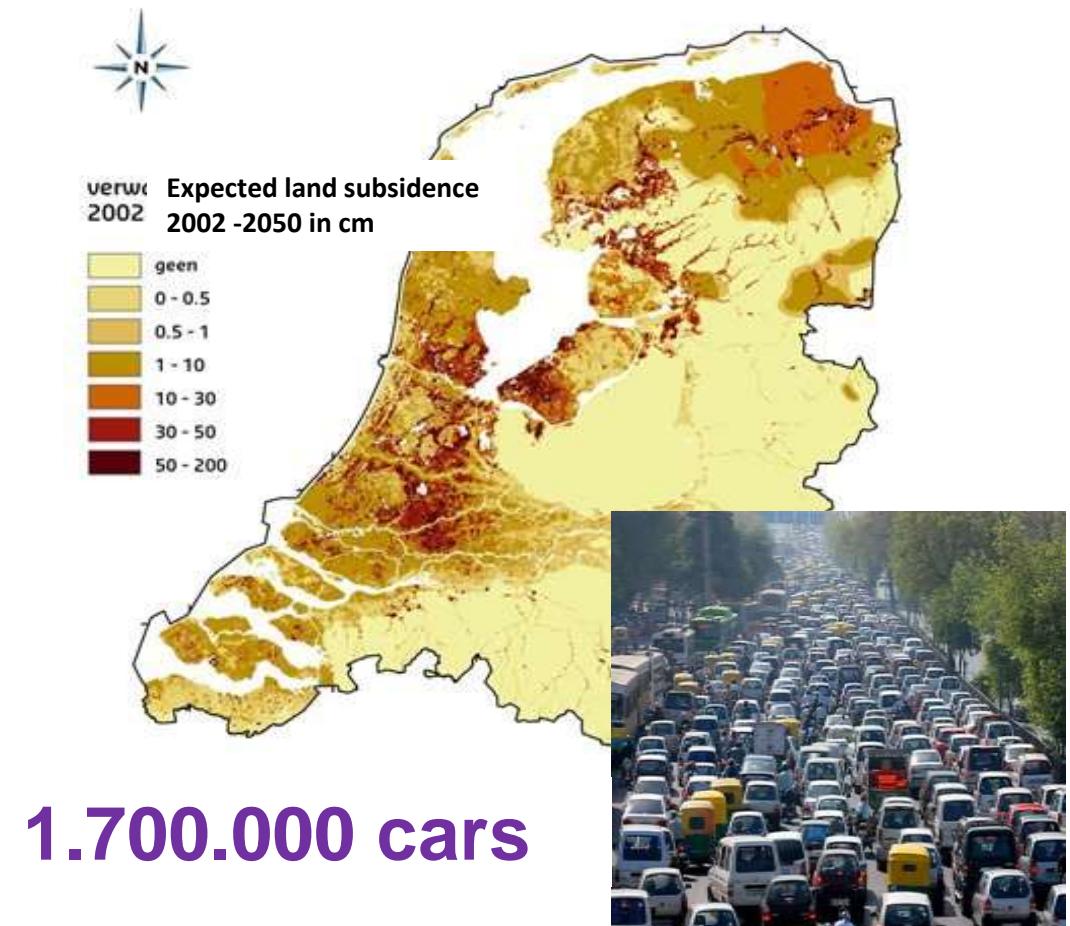

Using Sediment As a Resource

Land subsidence + GHG Emissions

Deepest point in Europe
– 6,74 meter below sealevel

Using Sediment As a Resource

Regional Waste products

Sediment:

- 150.000 m³ / year
- € 18 / m³
- 90% spreadable

Manure:

- 50 million Kg / year (NL)
- € 14 - € 18 / Kg

Green waste:

- € 19 - € 23 / 1.000 Kg

nutrients

Using Sediment As a Resource

Planned Effects

- Stop land subsidence
- Decrease GHG emission
- Start circular economy

Using Sediment As a Resource
