

# VIII SedNet Conference

8 November 2013

Short Wrap up of the  
Sediment Quality Session

## 7 presentations on sediment quality issues

### Impact of contaminants on biota

... impacts on nematodes, foraminifera, fish

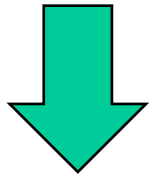

....models and tools for impact assessment

.... studies combining chemistry and ecotoxicology

### Observation:

Many presented studies were carried out by or on behalf of governmental institutions (not necessarily universities)

or communicated to them.

Increasing ... (?)

.....acceptance of effect-related data by decision makers

..... perception of scientists that their results may make a difference

## 7 presentations on sediment quality issues

### Impact of contaminants on biota
