

Understanding Sediment Fluxes and Budgets on a River Basin Scale

Gijs Breedveld, NGI, NO

Pieter de Boer, Rijkswaterstaat, NL

- Seven well prepared contributions, knowledgeable and enthusiastic speakers
- Wide range of hydromorphological problems from very large rivers to agricultural ditches.
- Selection of river systems from the mountains to the sea
- Effects human intervention on natural erosion processes (e.g. hydropower dams, land-use)
- Field measurement methods, modelling both mathematical and physical (scale model)
