

Assessing the status quo of the sediment quality in the Lahn River Poster 108

Over a **three years period** (2016-2018), **56 sites** along the **Lahn River/Germany...**

were characterized
for their **sediment quality**

Sediment contamination
toxic potential given as mean PEC-Q and WHO-TEQ values.

Direct toxicity
aquatic bioassays and a whole sediment bioassay

Assessing the status quo of the sediment quality in the Lahn River Poster 108

Effects
Bioassays
