

## Particles interactions and pollutant mobilisations

## Materials & Methods

## Study of pollution in sediment from Grau du Roi harbour

- ✓ Contaminants : Polycyclic Aromatic Hydrocarbon (PAHs)
- ✓ No PAHs in pore water
- ✓ PAHs found in Solid fractions
- ✓ Moderate contamination  
Concentration between 100 and 1000 µg/kg
- ✓ PAHs located in fine fractions for sample from the harbour (B & C)
- ✓ PAHs located in larger fractions for sample from the sea (M)
